

## Beach and sea near Mi Nhon Hotel

### Some info

Some guests are sometimes disappointed as they go to the sea (150m from Mi Nhon Hotel) and they are not able to swim because the sea level is too high (high tide) and only see a concrete wall (dike - no beach).

Half of world's sandy beaches are at risk from climate change. Due to coastal erosion and rising seas, the sanding beaches are shrinking every year. Unfortunately it is also quickly happening in Ham Tien/Muine.

In 2022, a promenade dike aiming to protect the village and slowing the erosion has been built (finished in February, 2023).

Now, the village is enjoying a 1.2km promenade where it is possible to do jogging, cycling or just enjoying the sunrise or especially beautiful sunset.

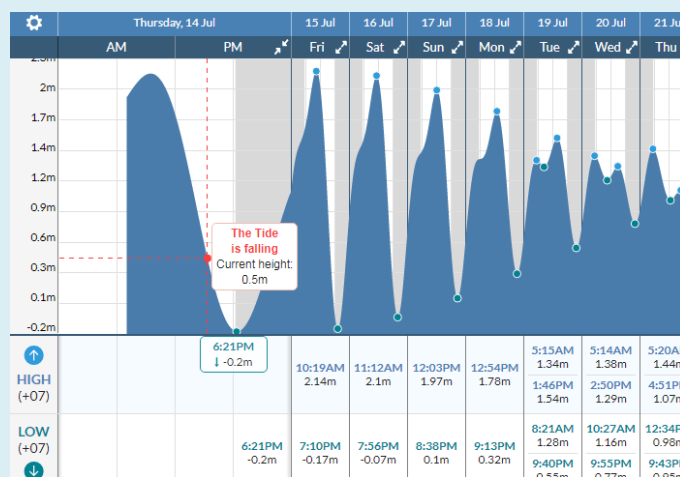

But jogging directly on the sandy beach will be only possible during low tides (below 0.7meter).

### When is the best time to enjoy the sea near Mi Nhon Hotel – please check the tide

You will be able to check by yourself when is the best time to go to the sea, by scanning this QR code to be able to check the current height of the tide and a weekly chart to see if the tide is falling or rising.

In this chart the tide is falling and the current height tide is 0.5m (a good time to go to the sea).  
The lowest tide will be at 6:21PM (0.2m)

If you do not understand how to read the chart, please ask our receptionist and they will explain to you.

If you prefer a bigger sandy-beach, you will have to drive around 5km. You can take the public red bus for 15000vnd/trip (wait at Café Lubu) or just ride our free bicycle (flat road). If you prefer, do not hesitate to ask our staff to call a taxi for you.
